MailGuard
Advanced Email Filtering

MailGuard's proprietary Artificial Intelligence (AI) threat-detection engines stop fast-breaking web and email threats in real-time

Seamlessly stackable with Office 365 and other email platforms, MailGuard provides an added layer of specialised email security to reduce the impact of cybercrime on business.

MailGuard's Advanced Email Threat Protection provides zero-hour defense, giving immediate access to updates, without the delay of downloading and testing a patch.

TLS Encryption

Secure Transfer of Email Across the Internet

MailGuard supports end-to-end email encryption and digital signing of messages. It utilises and supports TLS encryption of SMTP sessions to and from organisations with TLS supporting mail servers.

Advanced Email Threat Protection In The Cloud

Neutralize Threats Before They Enter the Network

Depend on the expertise of a provider that is constantly monitoring and combating new threats to your network, in real time. MailGuard's Advanced Email Threat Protection is 'in the cloud', eliminating threats before they impact your network, safeguarding you from slow system performance, reduced employee productivity and other business disruptions caused by spam.

Zero Onsite Software or Hardware Footprint

Delivers Low Total Cost of Ownership (TCO)

Delivered as fully managed Software-as-a-Service, MailGuard requires no hardware and no software licensing costs, and no expensive integration costs, as associated with on-premise solutions. With no technology to maintain, total cost of ownership is five to 10 times less than the traditional on-site application-hosting model.

24-Hour Provisioning Service Level Agreement

Fast Deployment with Performance Guaranteed

As a cloud-based Software-as-a-Service solution, MailGuard can be deployed within hours, rather than days or weeks associated with on-site email security applications. MailGuard is governed by strict Service Level Agreements (SLA) ensuring the utmost customer satisfaction.

Real-Time Management Custom Policies

Complete Control

Gain total control by having the right information at your fingertips and the ability to make immediate changes to email rules and alerts. MailGuard empowers you with the knowledge and tools to manage your email security with confidence.

Automated Reporting

Enforce Corporate Compliance and Reduce Risk

MailGuard allows you to enforce corporate governance policies by managing unauthorised distribution of confidential or commercially sensitive information. It also protects you from content-related legal liabilities by allowing you to manage offensive content being received and distributed across your network for protection of your data.

Extended Email Queuing and Continuity

Ensures Email is Not Lost Should your Mail Server be Unavailable

MailGuard includes a free extended queuing service to store all emails for up to five days, ensuring no email is lost during server outage. Your email is safely delivered to you when your mail server again becomes visible to MailGuard.
